NSA and ASA Are Your Advocates

The Nebraska Soybean Association (NSA), a state affiliate of the American Soybean Association (ASA) work together to be a your collective voice of 25, 000 U.S. soybean producers that are members of the Association. By making the choice to become a member of your state soybean organization, you make that collective voice even more powerful.

NSA and ASA are your advocates/lobbyists in Washington D.C., on issues like biodiesel legislation, farm bill policy, transportation, environmental issues and expanding market access. NSA is also at work on member's behalf at the Lincoln Statehouse. This policy work is paid for by your voluntary membership dues. *Soybean checkoff dollars CANNOT be used to influence policy/lobby — only your membership dues can.*

The Soybean Association's commitment to policy development begins with you.... It is a grassroots organization. Members elect state Board directors and voting delegates establish the policy goals.

For more than 85 years, ASA has been working on behalf of its members to build demand, improve profit opportunities, protect the soybean industry and prepare for the ever changing future.

Give us Strength and JOIN TODAY. If you Believe, Belong.

If you believe, belong.
